Appendix:
Conferences and Study Days relating to Sir Aurel Stein

So many Silk Road and Central Asian events have taken place around the world in the last twenty years that it would be impossible to list them all here. Many have focussed on particular themes, such as the Silk Road, Central Asia, Dunhuang, Buddhist art, ancient languages and scripts, religious studies, textiles and conservation. The five conferences and study days listed here have been selected to reflect the work that has taken place on the Stein Collections in London and Budapest, and to acknowledge the people who have done that work.

Sir Aurel Stein and Central Asia Study Day
London, 23 March 2002

This event was organised as one of a series of Central Asian study days at the British Museum. It also marked the launch of two books: the Catalogue of the Collections in the Library of the Hungarian Academy of Sciences, and Sir Aurel Stein in The Times. Most of the papers from this study day were published in the Sir Aurel Stein, 23 March 2002 (British Museum Occasional Paper 142, 2004).

The South Asian Legacy of Sir Aurel Stein – Conference
Leicester, 6–7 March 2004

This conference was organised by PRASADA (South Asian Arts) of De Montfort University, Leicester, in collaboration with the Circle of Inner Asian Art, University of London, with support from the British Academy, Circle of Inner Asian Art and the Society for South Asian Studies (British Academy). Its aim was to draw attention to Stein’s contribution to the study of South Asia, most of which in his lifetime was part of British India. Born as a Hungarian, Stein became a British subject and lived for most of his life in British India. His work in the field of textual scholarship, archaeology or topography of the North-Western peripheries of the subcontinent, that is Kashmir, the North-Western Frontiers, Sistan and Baluchistan, played a direct role in our understanding of ancient South Asia, while most of his explorations were undertaken to investigate India’s contact with neighbouring regions and the spread of her material and spiritual wealth in the surrounding areas. His achievements in the field of South Asian textual and material studies opened up new ways of research that are as important today as in his own time. The papers of this conference presented aspects of present-day research linked to South and Central Asia on material collected by Stein as well as his personal contact with South Asia and with his native country, Hungary, where he was first inspired to study.

Stein Aurél Emlekülés (Aurel Stein Conference)
Budapest, 13 May 2002

This conference was organised at the Hungarian Academy of Sciences in Budapest to celebrate the completion of the UK-Hungarian project to catalogue the Stein archive material in Budapest and the launch of the Catalogue of the Collections of Sir Aurel Stein in the Library of the Hungarian Academy of Sciences.
the ancient culture of India. It was planned to publish a volume of the conference proceedings, however this has not been possible.

Saturday 6 March
Introductory Remarks
Helen Wang (British Museum)

Stein Collections and South Asia
The Stein Collection from Central Asia at the Lahore Museum
Agnan Rehmani (Lahore Museum)
The Stein Collection at the Ashmolean Museum, Oxford
Madhuvanti Ghose (Ashmolean Museum and CILSA)
Precious stone and glass artifacts from the Stein Collection in the British Museum
Cecilia Bragin (British Museum)
Coins from Kashmir: Sir Aurel Stein’s Collection in the Heberden Coin Room, Ashmolean Museum, Oxford
Shailendra Bhandare (Ashmolean Museum)

Stein and South Asian Texts
Interpreting Gandhari Prakrit texts (paper read in absentia)

Abdur Rehman (Punjab University)
Alexander’s crossing of the River Jhelum with reference to Stein
M. Salim (Quaid-e Azam University)

Stein, Hungary and South Asia
Aurel Stein and Hungarian scholarship
Agnes Kelecsonyi (Library of the Hungarian Academy of Sciences)
Sir Aurel Stein’s photographs in the collection of the Hungarian Academy of Sciences
Lilla Russell-Smith (Circle of Inner Asian Art)
Aurel Stein’s correspondence with the Hungarian Indologist

Ervin Baktay
Géza Bethlenfalvy (Hungarian Academy of Sciences; Eotvos Lorand University)
Remembering Sir Aurel Stein: from unmapped accounts of his Kashmir labours
Surinder Nath Pandita (Independent researcher)

Concluding Remarks
Roderick Whitfield (SOAS)

A Hundred Years of Dunhuang, 1907-2007

This conference, organised by the British Academy, the British Library and the British Museum, took place in London, 17-19 May 2007. The aim of the conference was ‘to mark the centenary of Sir Aurel Stein’s discovery of a hidden library in Cave 17 at the Buddhist Caves, Dunhuang, and to reflect on the discovery, to review its impact on “oriental studies” including the writing and re-writing of history and to discuss directions for the future.’ Speakers from different disciplines were invited to give short papers on their research lasting no longer than 15 minutes. We had originally hoped to publish the conference proceedings, but the range of subjects proved too vast (and thus too demanding) to do this in a useful way. However, many of the papers have since been published elsewhere, and many delegates have confirmed that friendly conversations at the conference brought people from different disciplines together and sowed the seeds for new projects. The programme of the conference is published here as a record of the occasion.

Thursday 17 May 2007
The Discovery of Cave 17
Chairs: Helen Wang (British Museum) and Frances Wood (British Library)

Sir Aurel Stein, archaeological-explorer
Susan Whitfield (International Dunhuang Project, British Library)
Rudolf Hoernle and Aurel Stein

Locating Dunhuang in the broader history of the Silk Road

Valerie Hansen (Yale University)

Dunhuang and its place in world history and culture

Chairs: Roderick Whitfield (SOAS) and Victor Mair (University of Pennsylvania)

Closing remarks

Frances Wood (British Library)

Dunhuang: Past, Present, Future — Sir Aurel Stein and Dunhuang (conference)

14–15 December 2007

This conference, organised by the East Asian Department of the Lóránd Eötvös University of Humanities (ELTE), Budapest and the Circle of Inner Asian Art (CIAA), School of Oriental and African Studies (SOAS), University of London took place in Stein’s hometown, Budapest, to commemorate the hundredth anniversary of his expedition to Dunhuang. One aim of the conference was to take an up-to-date view of the links of Stein to Hungarian scholarship throughout his life. Stein always acknowledged the important role of Lajos Lóczy, who drew his attention to the importance of Dunhuang. Lóczy himself went there as early as 1879 with an Austro-Hungarian expedition organised by Count Béla Széchenyi. Other papers looked at the changing assessment of Stein’s role in China, and recent work on Stein’s collections in various countries around the world. Many of the papers have since been published, several of them in the Journal of Inner Asian Art and Archaeology, the journal founded by the CIAA. The conference was made possible by support from the Chiang Ching-kuo Foundation and the Chinese World Cultural Heritage Foundation.
